About Netcon

Founded in 2015, **Netcon Enterprise Private Limited** has grown into a trusted provider and manufacturer of advanced power and connectivity solutions.

With a strong commitment to quality and performance, Netcon serves customers across diverse sectors, delivering reliable products that ensure operational continuity and secure connectivity.

Our Focus

Delivering dependable infrastructure solutions that keep businesses powered, connected, and protected.

The company specializes in:

- ▼ **Network and Signal Cables**
- ▼ **UPS and Power Backup Systems**
- ▼ **Structured Cabling Solutions**
- ▼ **Network Racks and Enclosures**
- ▼ **Infrastructure Protection Systems**

Industry Leadership and Successful Partnerships

Through strategic partnerships with leading global suppliers and clients, we've earned trust as a preferred industry partner. Our track record includes a diverse portfolio of successful projects, from large-scale installations to tailored bespoke solutions.

Sustainability and Corporate Responsibility

Netcon Enterprise prioritizes sustainable practices and corporate responsibility. We focus on eco-friendly manufacturing, energy-efficient designs, and ethical business practices to positively impact the environment and society, alongside driving business growth.

Customer Commitment

We are committed to delivering exceptional customer service and support. By understanding each client's unique needs, we offer customized solutions that build long-term partnerships based on trust, reliability, and mutual success.

Quality Assurance

At Netcon Enterprise, quality is integral to our operations. We use rigorous quality control processes and advanced manufacturing technologies to consistently exceed customer expectations, adhering to international standards and certifications.

Shaping Futuristic Power & Network Infrastructure Solutions

Vision, Mission & Core Values

OUR **VISION**

To become a global leader in power and connectivity solutions by continuously evolving products to meet dynamic industry demands.

OUR **MISSION**

To deliver innovative solutions that enhance efficiency, reliability, and performance while setting industry benchmarks through technology and excellence.

CORE **VALUES**

- ▼ Quality First ▼ Innovation & Technology
- ▼ Customer Commitment ▼ Reliability & Performance
- ▼ Continuous Improvement

Netcon is a technology-driven infrastructure solutions provider specializing in power continuity and high-performance connectivity for mission-critical environments.

Since its inception, the company has built a reputation for delivering reliable, scalable, and globally compliant solutions across India and international markets.

With headquarters in Chennai and a corporate presence in Dubai, Netcon supports enterprise customers with engineering expertise, global sourcing, and responsive execution.

CABLES, UPS SYSTEMS & ACCESS CONTROL ETC.. ETC...

Netcon Enterprise specializes in high-quality network and signal cables, reliable UPS systems, and advanced access control solutions to keep your systems connected and secure. Headquartered in India, and having a Corporate presence in the UAE, the company maintains a robust international footprint, serving key markets across the Middle East, India and Africa.

Netcon delivers integrated, advanced access control solutions.

Supported by a responsive and proactive Sales and Customer Service team.

Strong pre-sales expertise focused on understanding and addressing customer requirements.

A standards-compliant brand committed to delivering high-quality products and reliable services.

Fast turnaround, with quotations for run-rate products and solutions provided within 24 - 48 hours.

Scalable product portfolio suitable for both small and large system applications.

Demonstrated capability to support project requirements with timely and competitive proposals.

Netcon combines strong technical expertise with a customer-focused approach to deliver reliable and high-performance connectivity solutions.

Extensive expertise in copper and fibre optic technologies.

Innovation-driven mindset focused on delivering added value and practical advantages.

Comprehensive end-to-end solutions fully aligned with international standards, ensuring optimal performance and simplified installation.

Competitive and value-oriented pricing structures.

An expanding portfolio of successful reference projects and growing recognition for technical excellence among leading organizations.

Flexible commercial arrangements tailored in line with partner eligibility and business requirements.

CABLES

Lorem Ipsum

CONTROL & SIGNAL CABLES

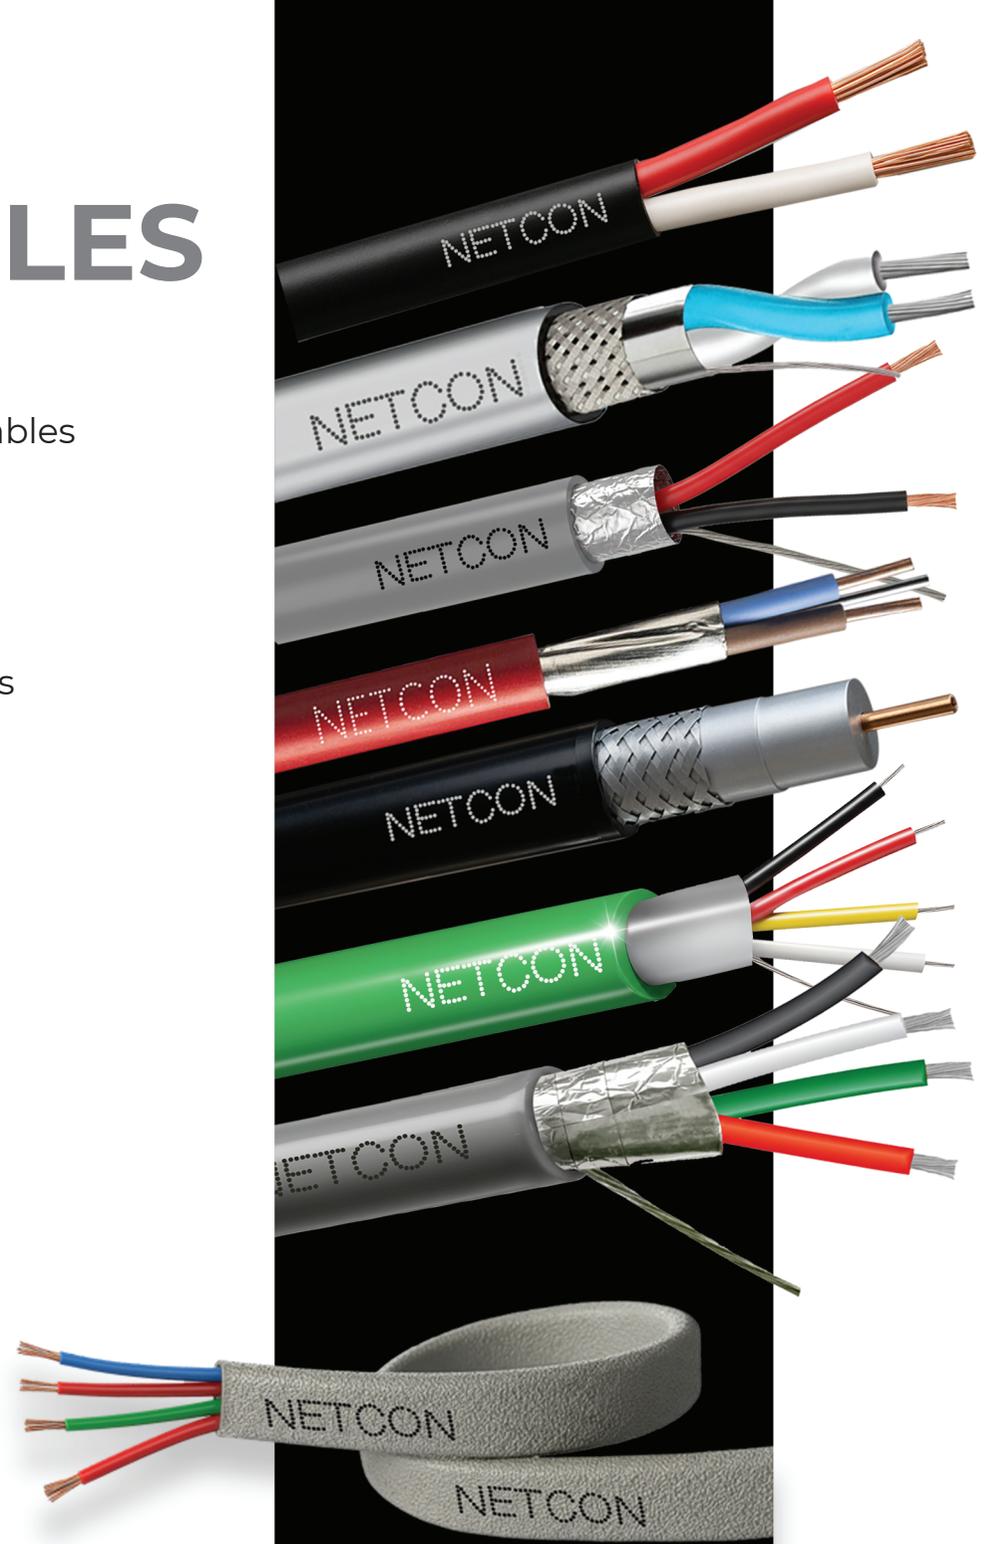

Netcon provides a wide range of high-performance control and signal cables designed for industrial and commercial environments.

PRODUCT RANGE

- Shielded and Unshielded Control Cables
- RS-485 Communication Cables
- EIB / KNX Building Automation Cables
- Tinned Copper Cables
- Hybrid Control Cables
- Lift Traveling Cables
- RF / RG Cables

APPLICATIONS

- Industrial Automation
- Building Management Systems
- Elevators
- Communication Systems

STRUCTURED CABLES

STRUCTURED CABLING SOLUTIONS

Netcon delivers complete structured cabling systems for high-speed and reliable data transmission.

SOLUTIONS OFFERED

Cat6 Cabling Systems

Cat6A Solutions

Cat7 & Cat8 High-Performance Networks

Outdoor Data Cabling

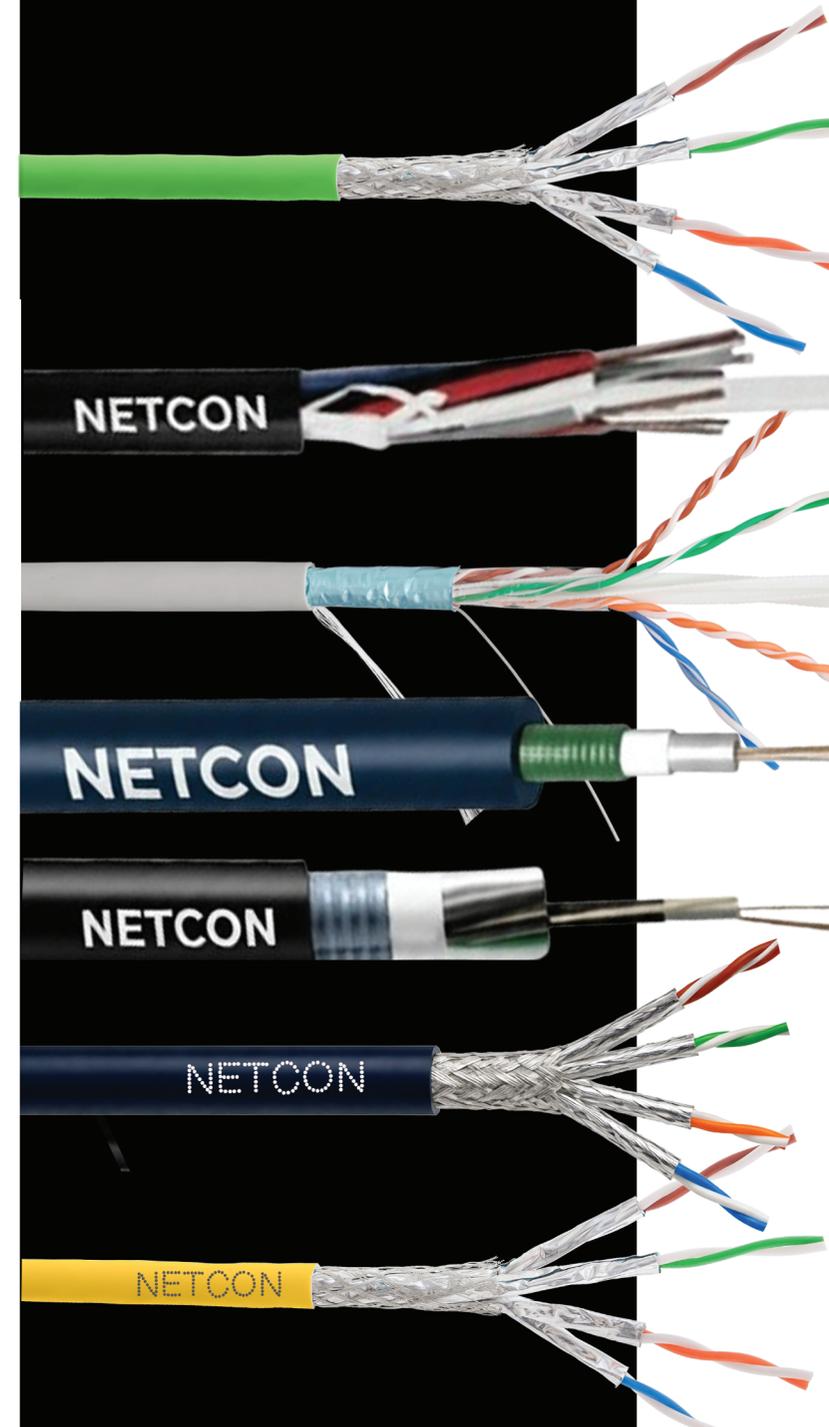

Fiber Optic Cabling Systems

BENEFITS

High bandwidth performance

Scalable network architecture

Reliable enterprise connectivity

UPS

UPS SYSTEMS

Netcon provides a full range of UPS solutions to ensure uninterrupted power for critical operations.

UPS RANGE

1-3 KVA Single Phase

6-10 kVA Systems

10-40 KVA Three Phase

50-200 KVA Industrial Systems

Modular UPS Systems

Line Interactive UPS

Outdoor & Industrial UPS

APPLICATIONS

Data centers

IT infrastructure

Healthcare

Industrial operations

Commercial facilities

IP ENCLOSURES

IP ENCLOSURES

The body is completely welded and resistant against water and dust.

Angled edges perfectly fit to the door seal thanks to the edge bends.

Narrow side bends provide extra space for interior installation.

The mounting plate can be mounted & removed easily.

The water and dust protection degree complies with IP65 (IEC EN60529)

Nano-zirconium based powder coating resistant against 600 hours of salt spray test

Coated with RAL7035 outdoor powder coating using Nanotechnology with the thickness of 70-90 microns.

Highly resistant for outdoor conditions.

For high resistance and aesthetic appearance, the door is strengthened with multiple bending angles.

Depending on the size, the door has one or two locks and the opening direction of the door is changable when requested.

Steel hinges ensure high resistance to corrosion.

Polyurethane casting seal is applied on the door to ensure impermeability.

Vertical mounting bars are located on the door to provide diverse mounting opportunities.

On the bottom of the enclosure, various sized embossed cable entries are available.

The bottom cable entry points are protected with sealed panel

RACKS & CABINETS

RACKS & CABINETS

Cabinets can be used indoors and outdoors for Wall & Ground Type

Electrical / Electronic / Industrial / Automation / Telecom / VDI purposes.

Wall, Pole or Ground mounting is available.

With accessories, 19" installations are available.

FEATURES

- | Easy installation
- | Standing or wall mounting installation
- | 180 degree turning angle for front door
- | Cable entry through bottom and top panel
- | Removable side panel
- | Welded frame
- | 19" Installation
- | Degree of protection IP20
- | Surface finish Degreasing, phosphoric, powder coated
- | Material: SPCC cold rolled steel

APPLICATIONS

- | Electrical
- | Electronic
- | Industrial
- | Automation
- | Telecom
- | VDI
- | Indoor / Outdoor

BATTERY

BATTERY BANKS

VRLA BATTERY

- Extended life
- Long float life
- Durable plates
- Deep-discharge recovery
- Deep cycle performance

Applications

Telecom control equipments, UPS systems, Inverter, Power equipments, Standby back up, Emergency power system.

BATTERY BANKS

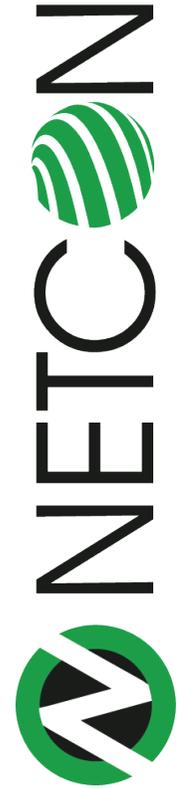

- Battery Support
- Configuration
- Compact, durable steel enclosure
- Thermal Design
- Longer battery life and energy efficiency
- High mechanical capacity
- Fire-resistant and insulated.
- Low noise level under 40 dB at 1 meter

LITHIUM ION BATTERY

- Battery Type: Internal LiFePO₄ battery with high safety, energy density, and long cycle life.
- BMS: Battery management system with overcharge, over-discharge, overcurrent, and temperature protection.
- Charge Management: Automatic charge/discharge monitoring with floating and even charge control.
- Voltage Protection: Low-voltage alarm and auto shutdown to protect the battery.
- EMC: Good electromagnetic compatibility.
- Protection: Current, temperature, short-circuit detection, and passive balance function.

GLOBAL PRESENCE

Netcon offers a comprehensive range of network and signal cables, dependable UPS systems, and intelligent access control solutions engineered for secure and uninterrupted connectivity. Headquartered in India and supported by a corporate office in the UAE, the company has established a significant footprint across the Middle East, Africa, and Indian markets.
